

**REMARKS**

Applicants appreciate the Examiner changing “active” to --reactive-- at many points throughout the specification.

Applicants have noted a few points where this change was not made, and for uniformity they make this change.

In paragraph [0034], to ensure the change is correctly made, while the Examiner refers to line 3, the change is actually needed at line 4; there is no occurrence at line 9; there is no occurrence at line 12.

With respect to paragraph [0063], the change the Examiner made refers to line 4; the change is actually at line 5.

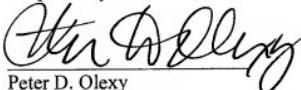

At page 34, line 7, the word corrected is “polysolvate” but it is referred to as “Polysolvate.” However, the basic change to “Polysorbate” is correct.

If Applicants have made the change and the Examiner has already made the change, the Examiner is requested to ignore Applicants’ request.

If the Examiner would prefer a Substitute Specification, The Examiner is requested to call the undersigned.

Entry and consideration of this Amendment are respectfully requested.

Respectfully submitted,

Peter D. Olexy
